

WARM WATERS SCHOOL · BASS, PANFISH & CARP

Homework, Week 5: Carp & Patience

Five minutes a day beats an hour on Saturday. Print this sheet and stick it on the fridge.

- ☐ Watch any fish (even minnows) for five minutes and predict where it will move next. Score yourself.
- ☐ Practice leading: have a partner walk slowly, and you cast the yarn two feet ahead of their path.
- ☐ Write down one fish that “beat” you and what you would do differently next time.

Parents: you don’t need to fish to help. Hold the hoop, count the reps, and ask what today’s cue was. Five minutes of attention beats an hour of equipment.
